One day this week one of the lady clerks of H. E. Lean's store discovered what she termed a large bug in a bunch of bananas. Upon investigation it was found to be a large tarantula, and it was also discovered to have a nest. The "bug" was eventually corrated in a preserve jar, and the nest with it containing eggs. Yesterday the eggs batched, and Mr. Lean now has a fine crop of "bugs," there being in all probably 500. They can be seen by the curious at his store.
